COUNCIL OF ENGINEERS OF THAILAND

ASSESSMENT STATEMENT

ASEAN CHARTERED PROFESSIONAL ENGINEER

INTRODUCTION

1. ASEAN Mutual Recognition Arrangement (MRA) on Engineering Services.

The Governments of Member Countries of the Association of South East Asian Nations as “ASEAN”; Brunei Darussalam, the Kingdom of Cambodia, the Republic of Indonesia, Lao People’s Democratic Republic, Malaysia, the Union of Myanmar, the Republic of Philippines, the Republic of Singapore, the Kingdom of Thailand and the Socialist Republic of Viet Nam, have agreed on the ASEAN Mutual Recognition Arrangement (MRA) on Engineering Services with the following objectives;

a) To facilitate mobility of engineering services professionals; and

b) To exchange information in order to promote adoption of best practices on standards and qualifications.

2. ASEAN Chartered Professional Engineer (ACPE)

2.1 A professional engineer who holds the nationality of an ASEAN Member Country and who possesses qualifications and experiences to comply with the requirements specified in Part B of this Assessment Statement may apply to be placed on the ASEAN Chartered Professional Engineer Register (ACPER) and accorded the title of ASEAN Chartered Professional Engineer (ACPE).

2.2 Under the MRA, the Professional Regulatory Authority (PRA) of each participating ASEAN Country shall authorize a Monitoring Committee (MC) to receive and process application from its professional engineers for registration as ACPE, and to maintain the ACPER. The PRA and the MC are shown in Part A of the Assessment Statement.

3. Registered Foreign Professional Engineer (RFPE)

3.1 An ACPE who wishes to provide professional engineering services in another participating ASEAN Country shall be eligible to apply to the PRA of a host participating ASEAN Country to be registered as a Registered Foreign Professional Engineer (RFPE).

3.2 A RFPE will be permitted to work, not in independent practice, but in collaboration with designated Professional Engineers in the said host country, and subject to domestic laws and regulations and where applicable, not making submissions to statutory authorities of the host country.
4. Purpose and Operation of Assessment Statement

4.1 The Assessment Statement provides a framework for the assessment of professional engineers for placement on the ACPER by the Monitoring Committee, Thailand.

4.2 This Assessment Statement shall be reviewed and accepted by the ASEAN Chartered Professional Engineer Coordinating Committee (ACPECC) before the Monitoring Committee, Thailand is authorized to operate the ACPER.

5. Privilege and Obligation of a Registered Foreign Professional Engineer (RFPE)

5.1 A RFPE shall not be eligible to work in independent practice in the host country, unless specifically permitted by PRA of a host participating ASEAN Country. As the PRA have statutory responsibility to register and/or license a practitioner so as to protect the health, safety, environment and welfare of the community within its jurisdiction, it may require a RFPE seeking the right to independent practice to be subjected to some form of supplemental assessment which aims to determine that the RFPE:

a) fully understands the general principles behind applicable codes of practice and laws in the host country;

b) has demonstrated a capacity to apply such principles safely and efficiently; and

c) is familiar with other special requirements operating within the host country.

5.2 A RFPE shall provide engineering services only in the areas of competence as may be recognized and approved by the PRA of the host participating ASEAN Country, and shall undertake assignments only in the specific discipline or disciplines in which he/she has been registered. He/she shall also be bounded by:

a) codes of professional conduct in accordance with the policy on ethics and conduct established and enforced by the host country in which he/she is registered as an ACPE; and

b) prevailing laws and regulations of the host participating ASEAN Country in which he/she is permitted to work as a RFPE.
6. Professional Regulatory Authority (PRA)

6.1 The Council of Engineers of Thailand (COE) is the Professional Regulatory Authority (PRA) in Thailand.

6.2 The COE is a statutory body under the Engineers Act B.E. 2542 (www.coe.or.th). The Act provides for the registration of professional engineers, regulates the qualifications and conduct of the professional engineers and regulates corporations which supply professional engineering services in Thailand. COE’s obligation is to safeguard life, property and welfare of the public by setting high standards for registering and regulating professional engineer. Its main objective of the registration of professional engineers is to ensure that engineering works that involve public safety and interest are carried out by engineers who are competent.

6.3 There are also other regulatory authorities who regulate engineering works that require to be certified by qualified persons who must be registered with the COE as Professional Engineers.

6.4 The COE has recognized the MRA on Engineering Services and appointed the MC to operate the ACPER.

7. Engineering Disciplines

7.1 According to the Engineers Act B.E. 2542, COE has regulated engineering disciplines in

- Civil Engineering
- Electrical Engineering
- Mechanical Engineering
- Industrial Engineering
- Mining Engineering
- Chemical Engineering
- Environmental Engineering

The regulated disciplines need registered engineers to acquire qualification and practical experience to ensure the competency, the responsibility to safeguard life and property, and the consciousness on public safety and environment.

7.2 For practitioners carrying out engineering works which are not in the prescribed disciplines, registration with the COE as professional engineer will not be necessary. For practitioners engaged in these non-prescribed disciplines of engineering, the COE has recognized and authorized the MC, as the competent and responsible body to exercise the function to assess and certify the qualification and practical experience of practitioners, and to register them as being technically and morally qualified to undertake independent professional engineering practice for the purpose of registration as ACPE.

8. The Monitoring Committee (MC)

8.1 The Monitoring Committee (MC) is appointed by the COE, and operates under the Engineers Act B.E. 2542. The committee members shall be nominated from various professional engineering institutions, such as:

a) The Council of Engineers (COE)

b) The Engineering Institute of Thailand (EIT)
c) The Consulting Engineers Association of Thailand (CEAT)
d) The Thai Contractors Association (TCA)
e) The Federation of Thai Industries (FTI)

8.2 The MC will be appointed by COE. Term of the service conforms to the term of the COE.

The current members of MC are shown in the Attachment 1.

9. Roles of the Monitoring Committee

9.1 The Monitoring Committee (MC) has taken specific responsibilities for the development and maintenance of the ACPER as set out in the MRA on Engineering Services.

9.2 In assessing compliance with the qualifications and practical experience for registration as an ACPE, the MC shall adhere to the criteria and procedures in this Assessment Statement.

9.3 The MC shall also undertake to ensure that all ACPEs on its ACPER.

a) comply fully with the requirements specified in the ASEAN MRA on Engineering Services; and

b) provide evidence(s) when apply for renewal of their registration that they have complied with the Continuing Professional Development (CPD) at a level prescribed in this Assessment Statement.

10. Authorization to Work as Registered Foreign Professional Engineers (RFPE)

10.1 Application by an ACPE from another participating ASEAN Country to work as a RFPE in Thailand shall be made to the COE. Upon acceptance and payment of a prescribed fee, the RFPE will be permitted by the COE to work in collaboration with designated local licensed Professional Engineers. The RFPE will not be eligible to work in independent practice to certify engineering works which is required by Thai laws and regulations to be signed by a professional engineer(s) or qualified person(s) for the purposes of submission to regulatory authorities unless he/she is registered as a professional engineer in accordance with the Thai Engineer Act B.E. 2542.

10.2 The COE shall monitor and assess the professional practice of the RFPEs to ensure compliance with the MRA. The COE may prepare rules which shall not contradict nor modify any of the provisions in the MRA, for the purposes of maintaining high standards of professional conduct and ethical practice in engineering.

10.3 The COE will notify the ACPECC Secretariat promptly in writing when a RFPE has contravened the MRA or the host country’s laws and regulations.
PART B: ASSESSMENT MECHANISM

11. Requirement for Registration as ASEAN Chartered Professional Engineer (ACPE)

11.1 A professional engineer who meets the following qualifications, practical experience and conditions is eligible for registration as an ACPE:
   a) completed an accredited or recognized engineering program set by the Board of Engineering Accreditation (BEA);
   b) possess a current and valid professional registration or licensing certificate to practice engineering works in Thailand by the COE;
   c) acquired practical and diversified experience of not less than 7 years after graduation;
   d) has spent at least 2 years in responsible charge of significant engineering works;
   e) complied with Continuing Professional Development (CPD) policy at a satisfactory level; and
   f) agrees to be bound by code of professional conduct and ethics.

11.2 An application for registration as an ACPE shall be made in the format prescribed in Attachment 2 of this Assessment Statement.

12. Engineering Education Accreditation

12.1 A graduation program accredited by the Board of Engineering Accreditation (BEA) is considered to have met the academic qualification requirement. The criteria and the procedures for accreditation of engineering programs are provided in Attachment 3 of this Assessment Statement.

12.2 A graduate of a foreign engineering program that is evaluated by the BEA and substantially equivalent to an accredited program is considered to have met the academic qualification requirement. The Council of Engineers (COE) would approve the substantial equivalent evaluation.

13. ASEAN Chartered Professional Engineer Assessment

13.1 A professional engineer is eligible for registration as an ACPE if he/she has at least 7 years of relevant practical experience after completing the accredited or recognized engineering program. Assessment of practical work experience shall be carried out through submission of a report describing the type, significance and level of responsibility of the practical engineering work experience attained over a period of at least 7 years since graduation. The report must demonstrate that the candidate has engaged in professional practice which, directly or indirectly, call upon his engineering knowledge, skills, experience and judgement, and has a significant influence on the technical direction of engineering projects.

13.2 A professional engineer should have spent at least 2 years in responsible charge of significant engineering works and this period should be within the course of the practical work experience since graduation.

13.3 Responsible charge of significant engineering work would be assessed as being equivalent to any one of the following situations:
   a) planned, design, and implemented a complete engineering project;
   b) undertaken a substantial part of engineering project while understanding the total project concepts;
   c) undertaken a project that requires multidisciplinary, complex or novel work responsibility.
13.4 Assessment will be carried out based on a report to be submitted by the professional engineer to the MC.

13.5 The Assessment Panel is assigned to review the Applicant’s practical work experience and responsible charge of significant claimed and to assess the relevance and adequacy for registration.

14. **Audit of ASEAN Chartered Professional Engineer**

14.1 An ACPE is required to renew the registration every 3 years. The documents submitted for the renewal should contain a current curriculum vitae and records of the CPD.

14.2 All professional engineers who are registered with the COE are bound by the Codes of Professional Conduct and Ethics. The MC will also require the Professional Engineers who are registered on the ACPER to be bound by the same Codes of Professional Conduct and Ethics.

14.3 Every ACPE is required to engage in CPD conforming to the COE registration as described in Attachment 4 of this Assessment Statement.
PART C: REGISTRATION PROCESS

15. Registration Procedure

15.1 This section describes the procedure involved in application for, or renewal of registration as ACPEs.
15.2 Application procedure for registration of an ACPE should follow the flow chart as shown in Figure 1, which are as follows:

   a) Application for registration shall be submitted, in the application form, to the MC. The details of the documents, initial registration fee, renewal fee are shown in the application form.
   b) The MC will appoint an Assessment Panel to review and assess the application.
   c) The result(s) of the evaluation shall be informed to the Applicant(s) in writing, soon after the endorsement by the COE.
   d) A certificate of registration will be issued to successful Applicant. The term of registration shall be 3 years from the date of registration, and shall be renewed on a 3 - year basis.

16. **Guide to Application for Registration as ACPE**

16.1 A professional engineer who is qualified to apply for registration as **ACPE** shall submit his/her application in the form as shown in Attachment 2, to prescribe academic qualification, professional practice experiences, responsible charge of significant engineering work.

16.2 The Applicant who is eligible to practice in specific engineering discipline or in engineering sub-discipline, would be preliminary reviewed for compliance with the licensing and the Professional Conducts and Ethics.

16.3 Assessment Panel will be appointed by the **MC**, each comprising a Lead Assessor and 2 Assessors who are Senior Professional Engineers or experienced Professional Engineers in the relevant discipline to review the applications, and carry out professional interviews to assess suitability for registration on **ACPER**. The Assessment Panels will make recommendations to the **MC** on whether a candidate should be placed on **ACPER**.

16.4 Professional interview, if necessary, may be conducted by the Assessment Panel to assess the practical experience in engineering. In such case, the **MC** will inform the Applicant of the date, time and venue for the Professional Interview.

16.5 Assessment Panel will prepare and submit its recommendations to the **MC**. The **MC** will check to ensure that there is no discrepancy and inadequacy in the assessment procedures. The **MC** will consider the recommendations of Assessment Panel. The decision to register the Applicant as an **ACPE** require majority votes of the **MC**.

16.6 The **MC** will ensure that documents containing information on its assessment of the Applicants for registration on the **ACPER** are available when requested by the **ACPECC** for purposes of review as required under the **MRA**.

COE
Continuing Professional Development (CPD)

The Council of Engineers of Thailand (COE) has set the activities that engineers can take for their continuing professional development (CPD). Those activities are counted as the Professional Development Unit (PDU) and are divided into 8 items as follows:

1. Formal learning
2. Informal learning
3. Seminar, conference and meeting
4. Participation in professional activities
5. Service activities
6. Industry involvement
7. Contribution to knowledge
8. Patents

Different activities however have different weights of score attached to them, see details in the Committee Rules on Continuing Professional Development (CPD) in the Attachment 5.
Committee Rules on Continuing Professional Development (CPD)

Professional Development Unit (PDU)

The Council of Engineers of Thailand (COE) has set the activities that engineers can take for their Continuing Professional Development (CPD). We count the activities as the Professional Development Unit (PDU). The Activities are divided into 8 items as follows:

1. Formal learning
2. Informal learning
3. Seminar, conference and meeting
4. Participation in professional activities
5. Service activities
6. Industry involvement
7. Contribution to knowledge
8. Patents

All of the activities have different weights of score attached to them. The COE has set the score according to the activities as the table below,
